

BC NETWORKS™

Managed Services Program

We make IT work

Total network peace of mind.

Your time is precious. You have more important issues to deal with than your computer network. It is, however, a critical enabler to your business and in need of attention to ensure it's running predictably, optimally and securely. Our fully managed program is the ideal solution for an organization like yours, an organization that demands the utmost in network reliability and quality service.

Total IT support and management for a fixed monthly price – it's that simple. We provide all of the benefits of an internal MIS department for a fraction of the price of staffing one yourself.

We reduce the business impact of IT failures by minimizing their occurrence, and any unforeseen issues are dealt with as a top priority.

All aspects of your network are covered: Security, networking, data protection, email, applications, hardware and user support - we handle it all for a single, predictable price.

Do these issues plague your business?

- **Stuck in a break-fix nightmare?** Many service providers just address the symptoms of downtime, and not the root cause!
- **No technology plan?** Does your organization lack a strategy for how technology can best serve it into the future?
- **Security fear?** Worried that vulnerable servers, laptops or PCs may be putting your organization at potentially devastating risk?

Program Advantages:

- **Lets you focus on your business:** We are your networking watchdog, enabling you to focus on your core business activities instead of managing a network or its problems.
- **Increased productivity:** Continuous insight into your network lets us reduce the business impact of IT failure by shortening the time from network failure to issue resolution.
- **Reduced business impact from IT failures:** Combining preventative maintenance and remote monitoring means we minimize failures that could impact your business.
